

# Daniel Karrenberg

Daniel Karrenberg is chief scientist at the RIPE NCC, the regional Internet registry for Europe and surrounding areas. He advises on research, creation and piloting of new services as well as general strategy development.

A computer scientist by training, Daniel likes to invent, design and implement Internet related systems, especially those collecting and processing data about the Internet itself. He also likes to occasionally inject physics, engineering and "networking style" into debates about Internet governance.

Daniel maintains his public biography on LinkedIn.

Ample information about his past sins can be found using your favourite search engine. Following are a few additional keywords you might use, arranged by decade.
