Lars-Johan Liman

Lars-Johan Liman is Senior Systems Specialist at Netnod Internet Exchange in Stockholm, Sweden. He is the technical lead for i.root-servers.net, one of Internet's 13 root name servers for the DNS system. He is also one of two co-chairs for ICANN's Root Server System Advisory Committee (RSSAC).

Lars-Johan holds a Master of Science degree in Engineering Sciences from The Royal Institute of Technology (KTH) in Stockholm, Sweden, majoring in Applied Physics. Between 1992 and 2000 he worked at the combined network operations centre for the Swedish academic and research network SUNET, the joint academic network for the Nordic countries NORDUnet, and one of the first pan-European backbones Ebone (no longer in business). In 2000 he moved to Autonomica, a newly created subsidiary to Netnod. Autonomica was merged into the mother company Netnod in 2010.

Lars-Johan focused on DNS early on, and has held various technical and administrative roles related to the DNS over the years. He's been involved with i.root-servers.net since 1992, and his currently functions include: responsible for i.root-servers.net, co-chair of RSSAC, member ICANN RSTEP, member of the IETF DNS Directorate, designer and maintainer of DNS systems for dozens of TLDs.

Lars-Johan's previous engagements include: Chair of the IETF DNSOP working group, member of ICANN's NomCom, member of the gTLD-MOU Policy Oversight Committee during the creation of ICANN.

Lars-Johan also operates a small consulting business (Cafax) in which he advises on, and conducts commercial training in, all aspects of DNS technology.
